FALL PLANTING FOR 1938

THE DAFFODIL FARM

OLYMPIA, WASH., R4.

For the thirteenth time we submit our annual fall bulb catalogue to assist you in the selection of your bulb wants. It is not as elaborate as we would wish, but in placing an order with us you are paying only for first quality bulbs and not expensive printing. As always, you will receive bulbs that will please you and that are honestly graded as to size. We take this opportunity to express our appreciation to those who permitted us to supply their orders last year.

GUARANTEE—We guarantee all stock true to name and free of disease and to please you on arrival. Further than this we cannot go, for we have no control over your climate or growing conditions. If for any reason you are not pleased with shipments, notify us at once.

PRICES POSTPAID—unless otherwise stated. Cash or 25% with order and balance c. o. d. Stamps with small orders welcome. 6 bulbs of one variety at dozen rate.

WE WISH TO TELL YOU--

That to grow fine flowers and good bulbs they must be planted early in the fall, and we believe that September is the best month. This applies to all bulbs listed herein except Tigridia which must be spring planted.

Do not let any kindly radio broadcaster influence you to set bulbs in November or December. Planted then they may bloom quite well but it will be done at the expense of the bulbs which have little or no roots, and they will be lost or of little use in the future.

Therefore, please order before October 15, so we can make our plantings at proper time.

DAFFODILS

The following list contains many of the fine newer ones and at lower prices than ever listed before, as well as most of the older commercial varieties. They are listed in family groups for your convenience.

September is the ideal month to plant and not later than October 15th. Set 6 or 7 inches deep in good fertile soil and not full shade. May be left two years, then dug after the tops die and divided.

FOLLOWING PRICES POSTPAID. DN. means large double nose bulbs having two or more flower buds. SN. means single nose or round bulbs having one flower center.

HYACINTHS

To add bright cheerful color to your early spring flower garden, Hyacinths are unexcelled. Always admired by everyone for their gorgeous color and fragrance. We offer you medium sized bulbs that will give the finest of blooms, better in fact than extra large bulbs. Should be planted in deeply worked fertile soil about six inches deep and may be left several years, if desired.

Prices postpaid, 10c each; \$1.00 per dozen; \$7.00 per 100.
6 of one kind at dozen rate; 25 at 100 rate, postpaid.

Hyacinths continued,

Bismark, a fine medium blue.
Dr. Lieber, dark porcelain blue, tinged lilac.
Gertrude, deep rose-pink, compact spike.
Grand Maitre, deep porcelain blue.
King of Blues, glossy deep purple blue.
King of Yellow, light creamy yellow.
La Victoire, an attractive deep red.
L'Innocence, large pure white bells.
Queen of Blues, light silvery blue.
Yellow Hammer, golden yellow.

BULB IRIS

The following strains of bulb Iris are a desirable part of any flower garden, coming into bloom just after daffodils and thru a period of six weeks, the English iris being the latest. The beautiful orchid shaped blooms are excellent for cutting. Plant in early fall five inches deep. The English iris may need some covering over winter in severe climates.

DUTCH IRIS. Earliest of the bulb Iris. Except where noted otherwise, .05 each; .50 per dozen; \$3.50 per 100 postpaid. 6 of one kind at dozen rate.
